Five stages of grief - Wikipedia
The five stages of grief model (or the Kübler-Ross model) postulates that those experiencing grief go through a series of five emotions: denial, anger, bargaining, depression and acceptance. Although commonly referenced in popular culture, studies have not empirically demonstrated the existence of these stages, and the model is considered to be outdated, inaccurate, and unhelpful in explaining

Erikson’s stages of psychosocial development - Wikipedia
Erikson’s stages of psychosocial development, as articulated in the second half of the 20th century by Erik Erikson in collaboration with Joan Erikson, is a comprehensive psychoanalytic theory that identifies a series of eight stages that a healthy developing individual should pass through from infancy to late adulthood. According to Erikson’s theory the results from each stage, whether
